General Idea :

Aqari is a smart real estate platform that simplifies buying, selling, and renting properties.

It brings all core features into one place: advanced search, verified listings, reviews, messaging, financing tools, and smart alerts.

Target Users :

1

Buyers & Renters

2

**Property Owners &
Real Estate Agents**

3

**Real Estate Offices
/ Platform Admins**

Research Methods Used:

1. User Interviews (3 users)
2. Online Questionnaire (Google Forms)

Key Findings:

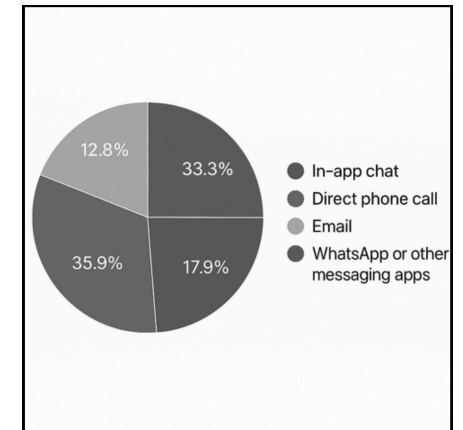

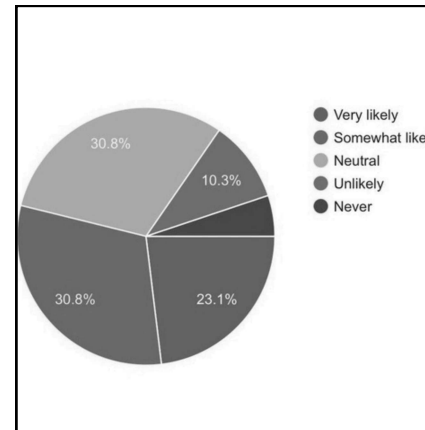

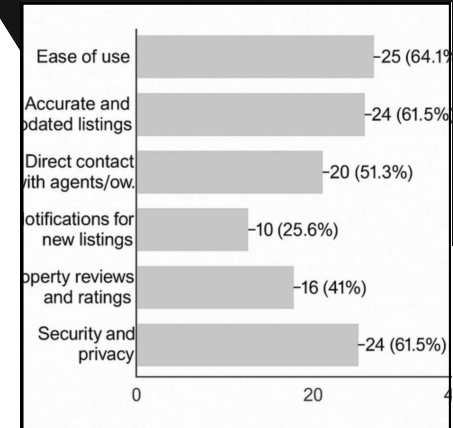

1. Users need accurate and updated listings
2. Financing options are unclear
3. Users miss opportunities without alerts
4. Trust issues in online platforms

Selected Survey Questions

What factors matter most when choosing a property app?

How likely are you to trust user reviews when selecting a property?

What communication method do you prefer when contacting property owners or agents?

Problem 1: Difficulty Choosing the Right Mortgage Option

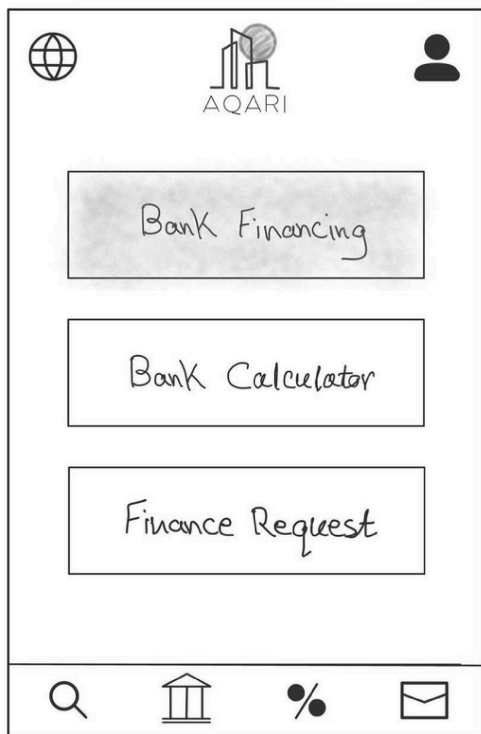

Insight: Users struggle to compare bank offers and understand financing options.

Need: A unified place showing interest rates, requirements, and bank details.

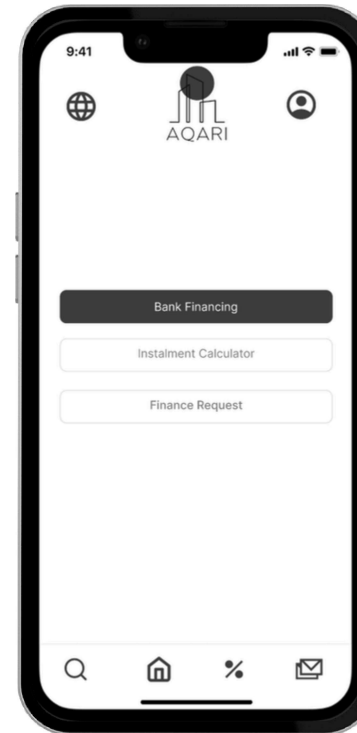

Solution:

- Bank comparison page
- Installment calculator
- Direct financing request

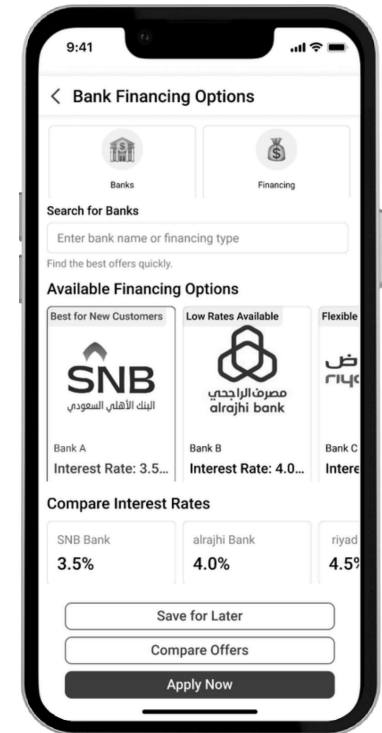

Low Fidelity

High Fidelity

Problem 2: Missing Timely Property Opportunities

Insight: Users spend time re-checking apps and still miss good listings.

Need: Real-time alerts for matching properties.

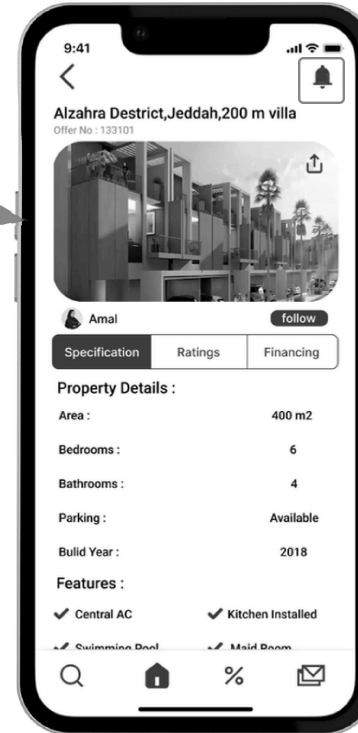

Solution:

- Smart alerts
- Filter-based notifications
- Instant updates with direct deep links

Low Fidelity

High Fidelity

Problem 3: Lack of Trust in Property Listings

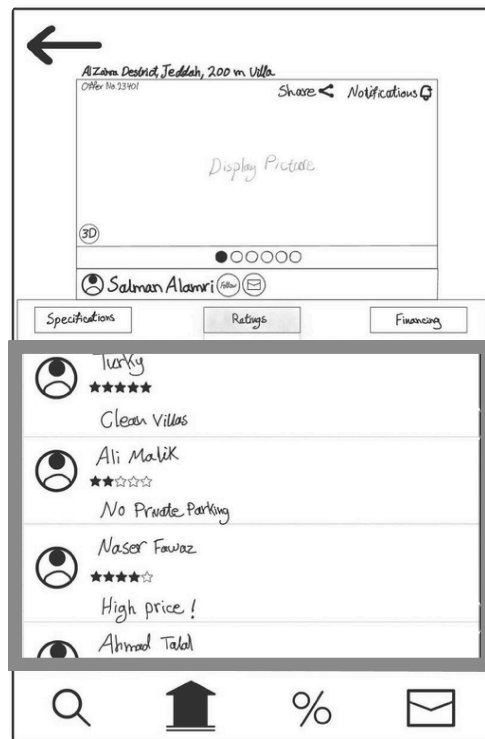

Insight: Users hesitate because photos, information, and prices often aren't accurate.

Need: A reliable review and rating system.

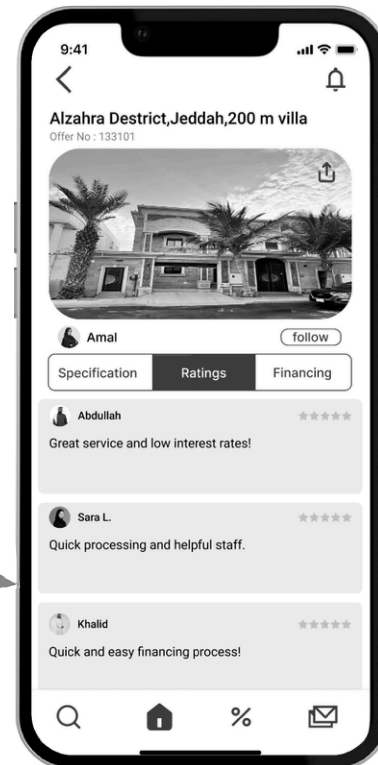

Solution:

- Property & seller ratings
- Verified user reviews
- Built-in messaging for transparency

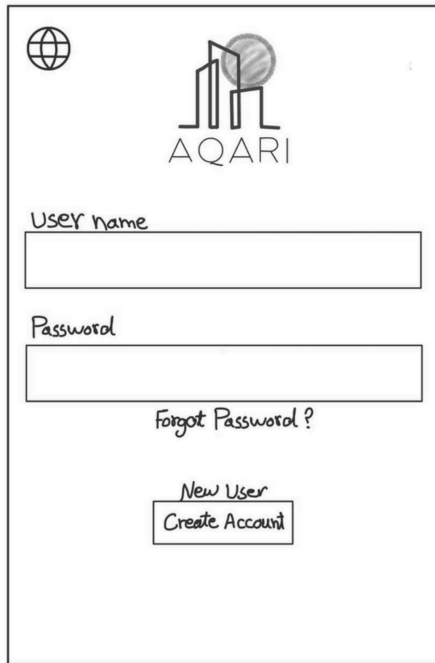

Low Fidelity

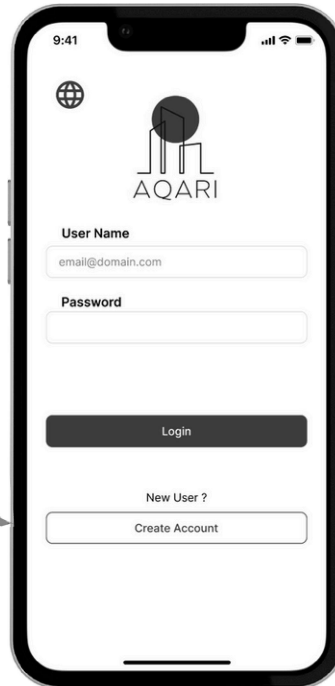

High Fidelity

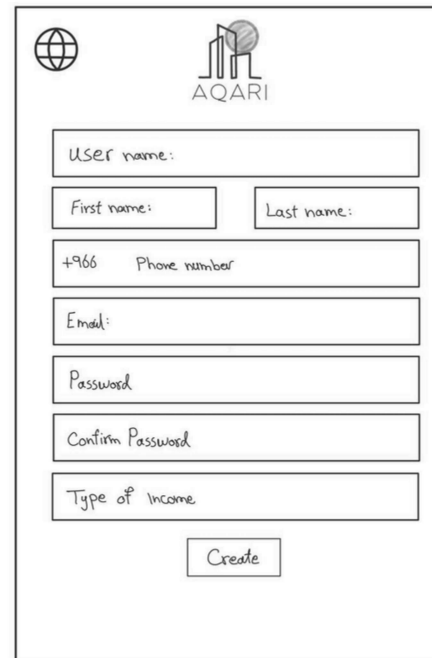

A hand-drawn low-fidelity wireframe for a login screen. At the top left is a globe icon, and at the top center is a logo consisting of three vertical bars of increasing height with a circle above them, labeled 'AQARI'. Below the logo, the text 'User name' is followed by a rectangular input field. Underneath is the text 'Password' followed by another rectangular input field. Below the password field is the text 'Forgot Password?'. At the bottom, the text 'New User' is above a button labeled 'Create Account'.

Low Fidelity

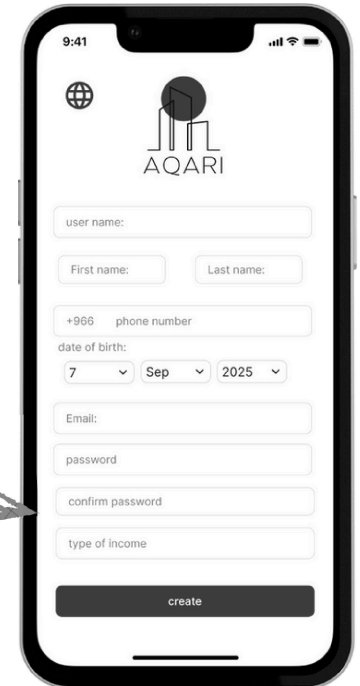

A high-fidelity digital mockup of the login screen on a smartphone. The status bar at the top shows the time 9:41 and signal/battery icons. The 'AQARI' logo is at the top center. Below it, the text 'User Name' is above an input field containing the placeholder text 'email@domain.com'. Below that, the text 'Password' is above an empty input field. A dark grey button with the text 'Login' is centered below the password field. At the bottom, the text 'New User ?' is above a button labeled 'Create Account'.

High Fidelity

A hand-drawn low-fidelity wireframe for a registration screen. At the top left is a globe icon, and at the top center is the 'AQARI' logo. Below the logo, the text 'User name:' is followed by a wide rectangular input field. Underneath, the text 'First name:' is followed by a rectangular input field, and 'Last name:' is followed by another rectangular input field. Below these is the text '+966 Phone number' followed by a wide rectangular input field. Underneath is the text 'Email:' followed by a wide rectangular input field. Below that is the text 'Password' followed by a wide rectangular input field. Underneath is the text 'Confirm Password' followed by a wide rectangular input field. At the bottom, the text 'Type of Income' is followed by a wide rectangular input field, and a button labeled 'Create' is centered below it.
